

This is to let you know I am against the NAB's petition 04-160. I listen to satellite radio both in my house and in my car. It offers many things that AM and FM radio do not. I also enjoy the lack of commercials and am willing to pay for it. I prefer to listen to traffic and weather on XM radio even though it is offered on the local AM station several times an hour, as it is available when I want it on satellite radio. The last thing we need are more restrictions on competition in the broadcast area.
